Profile

As a Solution Developer with 1.5 years of experience, I specialize in building and deploying scalable web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js). I excel in creating responsive front-end interfaces, developing robust back-end services, and integrating seamless database solutions. My skills in full-stack development, along with a strong focus on delivering high-quality code, enable me to contribute effectively to dynamic team environments.

Professional Experience

2024 – present
Uttarakhand, India

MERN Stack Developer

NovaNectar Services Pvt. Ltd.

- Design and develop responsive, interactive, and user-friendly UI components using React. Write clean, efficient, and well-documented code.
- Design and develop RESTful APIs using Node.js and Express
- Design and implement MongoDB databases to store and retrieve data. Ensure data consistency, integrity, and security
- Analyze complex problems and develop creative solutions. Troubleshoot and debug issues using various debugging tools
- Deploy MERN stack applications to production environments, Ensuring smooth deployment and minimal downtime. Perform regular maintenance and updates to ensure application stability and security.
- Work with cross-functional teams, including designers, product managers, and QA engineers

2022 – 2024
Pune, India

Solution Developer

Quadwave consulting pvt ltd

- **Design, Develop, Test, and Deploy:** Architect, build, and deploy scalable software solutions while ensuring high performance and reliability across all stages of the development lifecycle.
- **Code Quality:** Write clean, efficient, and well-documented code that adheres to best practices and coding standards, enabling easy maintenance and future enhancements.
- **Problem Solving:** Analyze complex technical problems and develop innovative and effective solutions that address both immediate issues and long-term goals.
- **Collaboration:** Work closely with cross-functional teams, including designers, product managers, and QA engineers, to ensure cohesive integration of software components and alignment with project objectives.

2022 – 2022
Pune, India

Software Developer intern

HotSync Software Solutions

- **Interface Design and Implementation:** Designed and developed a modern, user-friendly interface for a large enterprise product, enhancing the overall user experience and functionality.
- **Software Development and Maintenance:** Contributed to the development and maintenance of software solutions, adhering to established coding standards and best practices.
- **Collaboration:** Worked closely with developers and stakeholders to support project goals, ensuring effective communication and successful project completion.
- **Performance Improvement:** Implemented software solutions that optimized system performance and reliability, contributing to more efficient and stable operations.

Education

2019 – 2022	Master Of Computer Application <i>PCCOE pune</i>
2016 – 2019	Bachelor Of Computer Application <i>IMR College Jamner</i>

Skills

Frontend

HTML/CSS, JavaScript, Tailwind CSS, React (including Hooks and Redux), and responsive design for creating dynamic and user-friendly web interfaces.

Database

MongoDB, Mongoose for database management and schema design, with experience in data modeling and query optimization.

Frameworks

MongoDB, Express.js, React.js, Next.js and Node.js for building full-stack JavaScript applications.

Backend

Node.js, Express.js, MongoDB with Mongoose, REST API design, and API integration for developing scalable and efficient server-side applications

Version Control

Git, GitHub, DevOps

Deployment

Currently using Git for version control, Hostinger for web hosting, and Render for deploying and managing applications
